ADDICTIONS

Communication between stakeholders must be strengthened

Epidemiological studies

Prospective Studies – Foresight metodologie – Scenario building

Anticipate problems

Determine how much attention they deserve Proactive definition of policies

Better allocation of resources

Identification of weak signals

Considering the environement

What can Portugal do to prevent be caught off guard again in the drug domain?

28/10/2024

How relevant foresight can be for the drug situation? Prospective methodology – Scenario building

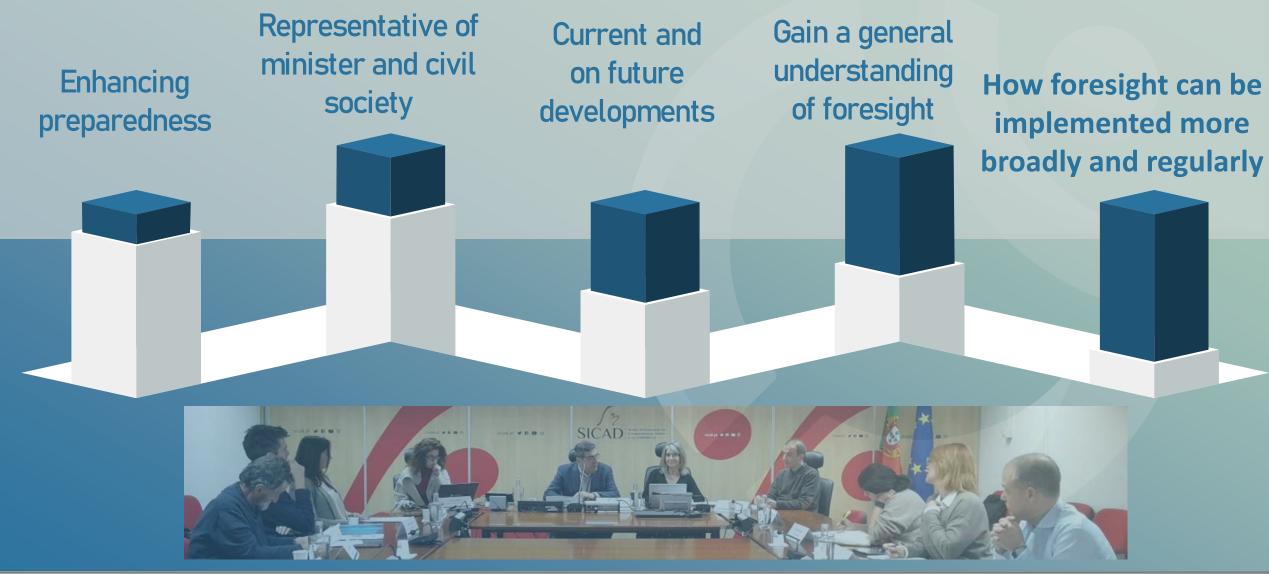

Workshop with experts to discuss the impact of previously identified megatrends in the drug field and needs

Foresight exercice - policymakers and key stakeholders

1. National Dialogue - Portuguese exercise

Decrease in use and less risky consumption patterns

Older, in a vulnerable and disadvantage situation

Chronic diseases

Therapeutic use of drugs

Improvements in the health and education of the Portuguese population may lead to a decrease in illicit drug use or, at least, less risky consumption patterns.

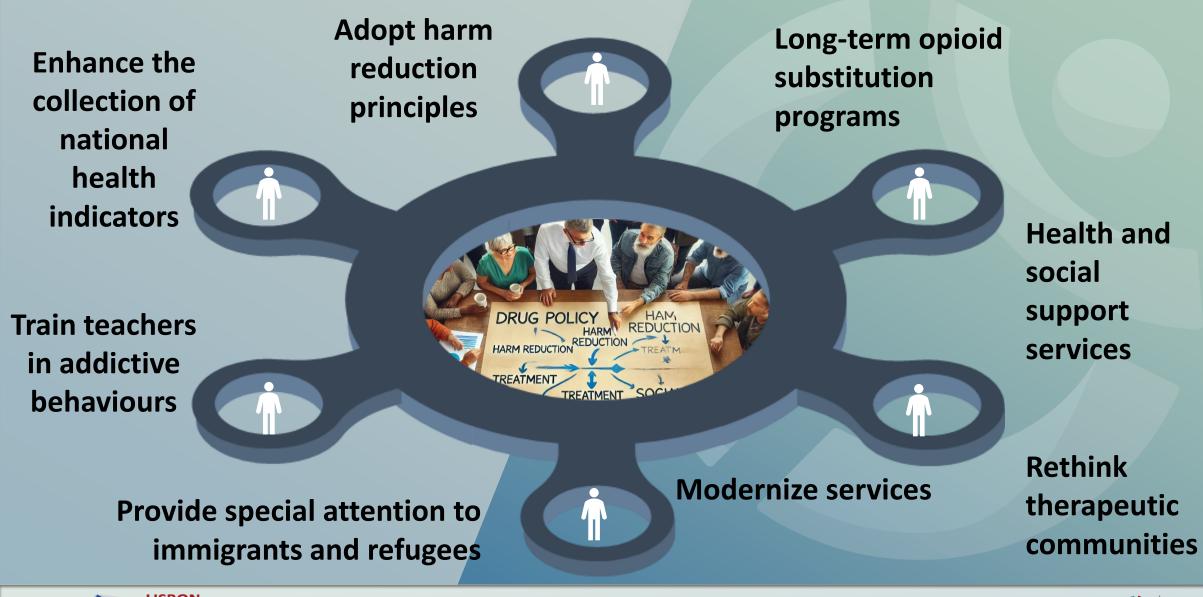

What can Portugal do to prevent be caught off guard again in the drug domain?

Ø

2. Nacional Dialogue - Portuguese exercice – measures recommended
